

Program: Reserve Sharing

Overview

The Reserve Sharing Program covers areas associated with the Northwest Power Pool Reserve Sharing Operating Procedures, the Western Electricity Coordinating Council (WECC), Policies and Procedures, as well as North American Electric Reliability Corporation (NERC) Policies associated with operating reserve. The program will consist of lecture, group and individual interchange, as well as a pre-instruction and post-instruction test.

Course Content

Identify the purpose and goal of operating reserve.

Review of the Northwest Power Pool Reserve Sharing Operating Procedures and the interrelationship among Control Areas and major interconnections within the Western Interconnection.

Major Attributes: Highlight, review and understand the major elements necessary to assure system reliability while maintaining appropriate reserve levels.

Process: Step through the Northwest Power Pool Reserve Sharing Operating Procedure, highlighting compliance levels with both WECC and NERC.

Target Audience

The program is intended for control area and support personnel operating the Bulk Electric System wishing to expand their knowledge and enhance their skills associated with system restoration. It is intended to provide attendees with a comprehensive understanding of the guidelines, process and philosophies which will assist them in performing their day-to-day tasks and, in the event of an outage, assist them in the actual restoration of the system.

NERC CEHs: 4 NERC CEHs

WECC CEHs: 4 WECC CEHs

Qualifies for Emergency Operations credit.

Registration Fee: Northwest Power Pool Members No Fee, Non-Members \$75.00.
