

TCWG West of Cascades (WOC) Subgroup
Nov 30, 2009

Philip Augustin

Per conference call, all subgroups use common agenda for. Some items on the agenda have been resolved previously for WOC.

Base cases: Columbia Grid is working on HS 2013 and HW 2014 cases. PGE needs these scaled to 2015 load level. James Randall will provide improvements on the case and wind models. Sensitivities: wind, west side generation (voltage stability). Action Item - PGE and BPA will work on resource dispatch.

Tables: will use the current load model until WECC (MVWG) approves the new one.

Model records are posted on the TCWG page of the NWPP website. Some information still uncertain (eg NEO location)

Outage list (with RAS): J Day, West of McNary, Slatt, WOCS (James Randall to develop)

Paths to be monitored: All 10% or greater to be modeled

Known path sensitivities/interactions: WOS, WOM, WOMR, CX, WOCS

Study Matrix: Action Item – Philip Augustin

Study Plan: Action Item – Philip Augustin
